

KIPP:Impact

ACADEMY

7000 103rd St. Jacksonville, FL 32254

Founded in 2010, KIPP Impact Academy believes every child can succeed with the proper support and opportunity. Therefore, not only does the administration strive to develop students academically, but they also push to develop the whole student socially and emotionally while affirming their identity. They reach this goal by maintaining high expectations, providing culturally relevant instruction, and using authentic texts and innovative curriculum.

In addition, Impact provides a joyful, welcoming environment to students and families. It aims to be a pillar within the community it serves by providing resources and support to enhance outcomes for Kippsters. Their work is grounded in relationships. To that end, teachers are always ready, responsible, and respectful to students and families to ensure they are invested and committed to the academic growth of all their students.

Impact teachers are also required to have a growth mindset around students and firmly believe that each day is a fresh start. To ensure that students are improving and growing in their practice, teachers are adaptive to the needs of their students through consistent feedback, data-driven instruction, and providing support and scaffolds to meet students where they are and help them grow. Together as a team and family, they strive to position Kippsters to be prepared to achieve in every field they pursue.

Impact is a B grade school located on Jacksonville's West side. The administration services a diverse population; and has special services to help Creole and Spanish speaking families.
